

With UTA you are always safe on the road - and that includes all federal roads

1 July 2018: With UTA you are prepared for the toll extension!

According to the fourth amendment to the Federal Trunk Road Toll Act of 31 March 2017, toll is extended to include vehicles from 7.5 tons of permissible total weight on **ALL** German federal roads. Accordingly, there will be 40,000 toll road kilometres.

While UTA cannot cover these additional toll costs for you, we can help you with most of the administrative work. You will continue to be able to settle the HGV toll easily and without cash through us.

Would you like more background info?
